Notification of Non-Compliant Appeal Brief (37 CFR 41.37)	Application No. 10/013,981	Applicant(s) HAN, CHIA-HUI	
	Examiner Shi K. Li	Art Unit 2613	

--The MAILING DATE of this communication appears on the cover sheet with the correspondence address--

The Appeal Brief filed on 13 March 2006 is defective for failure to comply with one or more provisions of 37 CFR 41.37.

To avoid dismissal of the appeal, applicant must file an amended brief or other appropriate correction (see MPEP 1205.03) within **ONE MONTH or THIRTY DAYS** from the mailing date of this Notification, whichever is longer. **EXTENSIONS OF THIS TIME PERIOD MAY BE GRANTED UNDER 37 CFR 1.136.**

1. ☐ The brief does not contain the items required under 37 CFR 41.37(c), or the items are not under the proper heading or in the proper order.
2. ☐ The brief does not contain a statement of the status of all claims, (e.g., rejected, allowed, withdrawn, objected to, canceled), or does not identify the appealed claims (37 CFR 41.37(c)(1)(iii)).
3. ☐ At least one amendment has been filed subsequent to the final rejection, and the brief does not contain a statement of the status of each such amendment (37 CFR 41.37(c)(1)(iv)).
4. ☒ (a) The brief does not contain a concise explanation of the subject matter defined in each of the independent claims involved in the appeal, referring to the specification by page and line number and to the drawings, if any, by reference characters; and/or (b) the brief fails to: (1) identify, for each independent claim involved in the appeal and for each dependent claim argued separately, every means plus function and step plus function under 35 U.S.C. 112, sixth paragraph, and/or (2) set forth the structure, material, or acts described in the specification as corresponding to each claimed function with reference to the specification by page and line number, and to the drawings, if any, by reference characters (37 CFR 41.37(c)(1)(v)).
5. ☐ The brief does not contain a concise statement of each ground of rejection presented for review (37 CFR 41.37(c)(1)(vi)).
6. ☐ The brief does not present an argument under a separate heading for each ground of rejection on appeal (37 CFR 41.37(c)(1)(vii)).
7. ☐ The brief does not contain a correct copy of the appealed claims as an appendix thereto (37 CFR 41.37(c)(1)(viii)).
8. ☐ The brief does not contain copies of the evidence submitted under 37 CFR 1.130, 1.131, or 1.132 or of any other evidence entered by the examiner and relied upon by appellant in the appeal, along with a statement setting forth where in the record that evidence was entered by the examiner, as an appendix thereto (37 CFR 41.37(c)(1)(ix)).
9. ☐ The brief does not contain copies of the decisions rendered by a court or the Board in the proceeding identified in the Related Appeals and Interferences section of the brief as an appendix thereto (37 CFR 41.37(c)(1)(x)).
10. ☒ Other (including any explanation in support of the above items):

When the Office holds the brief to be defective solely due to appellant's failure to provide a summary of the claimed subject matter as required by 37 CFR 41.37(c)(1)(v), an entire new brief need not, and should not, be filed. Rather, a paper providing a summary of the claimed subject matter as required by 37 CFR 41.37(c)(1)(v) will suffice.

SUMMARY OF CLAIMED SUBJECT MATTER

FOR DEFECTIVE APPEAL BRIEF

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Dear Sir:

In response to the Notice of Non-Complaint Appeal Brief dated July 18, 2007, please enter the following SUMMARY OF CLAIMED SUBJECT MATTER. As the Office holds the brief to be defective solely due to appellant's failure to provide a summary of the claimed subject matter as required by 37 CFR 41.37(c)(1)(v), only the SUMMARY OF CLAIMED SUBJECT MATTER, not the entire brief, is enclosed herewith.

Also enclosed herewith is a copy of the Notice of Non-Complaint Appeal Brief.

JUL 25 2007

Docket No. JCLA7632
US App. No. 10/013,981**V. SUMMARY OF CLAIMED SUBJECT MATTER**

The claimed subject matter of independent claim 1 involved in the appeal is directed to a transmission method for identifying infrared transmission head functions through an infrared controller coupled to an infrared transmission head (as shown in Fig. 4, and as discussed in Lines 1-3 and 5 in Para. [0018]). This method comprises the following steps (Fig.4 and Line 1 in Para. [0018]). As in step S600, the infrared controller is set in a test circuit mode (Fig.4 and Line 4 in Para. [0018]). As in step S610, a test brand name and its corresponding test transmission mode of the infrared transmission head are selected among a plurality of brand names (Fig.4 and Lines 5-7 in Para [0018]). Said infrared controller is programmed according to the test transmission mode corresponding to the test brand name of said infrared transmission head (Fig.3 and Lines 23-27 in Para. [0017]). As in step S620, said infrared controller sends out transmission test data corresponding to the test brand name to the infrared transmission head, and receives test data according to the test transmission mode corresponding to the test brand name of said infrared transmission head (Fig.4 and Lines 8-9 in Para. [0018]). As in steps S630 and S640, said test brand name and associated test transmission mode of said infrared transmission head are registered when said transmission test data and said received test data are identical (Fig.4 and Lines 9-11 in Para. [0018]). As in step S650, said infrared transmission head operates according to the registered test brand name and test transmission mode of said infrared transmission head (Fig.4 and Lines 11-12 in Para. [0018]). Wherein, said infrared controller's sending out transmission test data and said infrared controller's receiving test data occur concurrently (as shown in step S620 and Line 8 in Para. [0018]).

The claimed subject matter of independent claim 6 involved in the appeal is directed to a transmission method for identifying infrared transmission head functions (as shown in Fig. 4, and as discussed in Lines 1-3 in Para. [0018]). This method comprises the following steps (Fig.4 and Line 1 in Para. [0018]). An infrared controller is coupled to an infrared transmission head (Fig.3 and Line 5 in Para. [0018]). Said infrared controller is programmed (Fig.3 and Lines 26-27 in Para. [0017]). As in step S620, said infrared controller sends out transmission test data corresponding to the test brand name to the infrared transmission head, and receives

Docket No. JCLA7632
US App. No. 10/013,981

test data according to the test transmission mode corresponding to the test brand name of said infrared transmission head (Fig.4 and Lines 8-9 in Para. [0018]). As in steps S630 and S640, said test brand name and associated test transmission mode of said infrared transmission head are registered when said transmission test data and said received test data are identical (Fig.4 and Lines 9-11 in Para. [0018]). Wherein, said infrared controller's sending out transmission test data and said infrared controller's receiving test data occur concurrently (as shown in step S620 and Line 8 in Para. [0018]).

Respectively submitted
